FOR AVALANCHE SAFETY INFORMATION
(406) 587-6981

Idaho open to snowmobiling from Thanksgiving to June 1st.

- Always wear an approved helmet and eye protection
- Observe all state and local laws
- Respect others and wildlife
- Observe trail speed limits and restricted areas
- Ride within your capabilities
- Allow extra time and plenty of distance for maneuvering
- Stay off plowed roads

SNOWMOBILERS AND SKIERS BEWARE!

Travel over frozen lakes, rivers, and streams is not recommended! Traveling on ice is dangerous. If you choose to travel on frozen, lakes, rivers and streams, use extreme caution.

- Snowmobiles are difficult to control on ice and fast stops are impossible.
- Never travel on dark colored ice or ice covered with slush.
- Areas with springs or currents erode ice and do not freeze solid.

EMERGENCY - DIAL 911

AVALANCHE

Avalanche danger cannot be taken too seriously because a wall of moving, suffocating snow leaves few survivors in its wake. The best way to avoid an avalanche is to be knowledgeable of avalanche conditions and reroute your trip to avoid them. Avalanches occur when loose snow or a slab of snow starts moving down a slope. Avalanches are triggered by a variety of slope, snow and weather conditions; many times they are triggered by human impact. Slope conditions to watch out for are steep slopes or smooth, open slopes. Short slopes can be as dangerous as long ones. Leeward slopes are dangerous because wind-deposited snow adds depth and may create unstable slabs of snow.

Avoid avalanches by staying away from mountainous terrain after heavy snowfall or prolonged periods of high wind. Avoid crossing steep side hills or entering narrow, steeply sided canyons. The safest routes are on ridgelines and on the windward side, away from cornices. The next safest route is out in the valley, far from the bottom of a slope.

AVALANCHE SURVIVAL

If you are caught in an avalanche:

- Call out so other members of your party can track your location.
- Discard all equipment and get away from your snowmobile.
- Make swimming motions and try to stay on top; work your way to the side of the avalanche.
- As you feel the avalanche slow, try to thrust your hand or any other part of your body above the surface.
- Before the snow settles, slip your arm in front of your face to clear an air space.
- Try not to panic; you need to preserve oxygen.

If you are a survivor, you are a victim's best hope of survival:

- Mark the place where you last saw the victim and keep your eyes fixed on the moving mass of snow in which he is trapped.
- Search for the victim directly downslope from the last sighted area when the snow stops moving. Use a ski pole or stick to probe the snow.
- Stay with the victim unless help is only a few minutes away; after 30 minutes, the victim has only a 50 percent chance of survival.
- If the victim is found, treat for hypothermia, suffocation and shock.

The Love of Snowmobiling

West Yellowstone Snowmobile Trails
Including Island Park (the Idaho area)

Montana and Idaho require **ALL out-of-state snowmobiles and snow bikes** to have a **non-resident license**.
Montana non-resident snowmobile and snowbike licenses cost **\$35.00**.
Idaho non-resident 1-year snowmobile licenses cost **\$59.50**.
Idaho non-resident 2-year snowmobile licenses cost **\$117.50**.

Montana requires **ALL residents with "mechanized equipment"**, including snowmobiles, fat-tire bikes, and converted motorized snow bikes to have a Groomed Trail Pass
The Groomed Trail Pass costs \$20.00 for two years.

Licenses and groomed trail passes are available at authorized snowmobile vendors and the West Yellowstone Visitor Information Center.
